

## ECIA Compliant RV Cover Colors

RV covers can come from any manufacturer but must be in a solid color and in darker earth tones (like our darker stucco colors), or in a dark green or dark gray color. These RV cover colors tend to be the least visible on our Eldorado landscape and are more effective at screening RV's. Such RV Cover Colors help to minimize the visual impact of RV's on our environment, as is the goal of Section 13 of the Covenants, which states:

*"Recreational vehicles, such as motor homes, RVs, campers, camper shells, vehicle accessories, trailers, horse trailers, airplanes, boats and the like, when stored on a lot shall be located so as to minimize their visual impact on the surrounding neighborhood and roads, and shall be obscured by screening in a reasonable manner, for example by the dwelling house and/or with plantings or fencing."*

Approved Eldorado Stucco colors can be found on our website at this link: <https://eldoradosf.org/wp-content/uploads/2021/11/Updated-stucco-colors-2021.pdf>

Residents can locate covers at these below websites as well as being able to find basic Dark Brown/Dark green poly tarps at most local hardware stores.

What we do remind residents is that covers with white tops, or covers with designs on them, do not work well to screen RV's as instead it calls attention to the RV. Some examples of **non-acceptable covers** are shown below:

Examples of compliant solid colored covers are shown below:

Before you go out and spend hundreds of dollars on a new cover, we urge you to contact our offices and check with the ECIA to ensure that the cover you are purchasing will be acceptable.
